

Economics

Economics is what keeps the United States of America going. The country prides itself on its free market, capitalist system that is constantly creating and maintaining jobs. Economics is that is constantly creating and maintaining jobs. Economics is taken very seriously here at the Sherman party because we believe that people are entitled to the money they make. That being said we still find taxes a necessary way to fund the government. The United States' free market system does benefit most; however, there are still many ways to improve the system. We here at the Sherman party believe that first America must focus on its own economic health before we start any new major projects.

The National Debt

As most citizens may know, America has struggled with some major debt throughout the country's history. We at the Sherman party believe that in order to advance as a nation we must first take a second to get ourselves in order. To do that we believe that America must focus on the giant debt and how to fix it through budget workings.

Veterans Programs

After cleaning up the debt, we here at the Sherman party also feel as though our veterans programs need work because too many veterans become homeless after their service. Today many of the programs often cheat the veterans out of health care benefits and money that could help them survive. We believe that this will be easier accomplished after the national debt is sorted out. The veterans programs need an increase in funding to include better stability and health care to give back to those who fought to keep this country safe and free. However, veterans programs aren't the only things that need work, the education system also needs funding.

Education Funding

The Sherman Party believes that teachers should not have to work two jobs so they can focus on the future of our society. Education is very important to the success of our nation and we believe that it should be funded more. We believe that no teacher should have to work two jobs because the education of students is a full-time job. The education budget should be increased for the betterment of the country and for a good future. A teaching salary should be made to be enough to live off of a teaching salary should be made to be enough to live off of so teachers can focus on their students and their work over a second job.

Economic Policies

With these programs in mind, the Sherman Party would also like to express its concern for the working man. We believe that, as a nation, we should focus on how to increase this program without any major increases in taxes. This will help to keep money in all of our citizens' pockets to keep the economy going. We at the Sherman party believe that through our immigration policies we can accomplish all of the fixes and tweaks we believe our economy needs without having to raise taxes very much. Our new immigration process makes it easier to become a citizen so America can bring in more tax dollars due to its increased number of citizens. This will improve the economy immensely and help the US cover its debt and fund the programs we find necessary for the American people.
